Gooseberry and Currant bushes, Grape Vines, Strawberry Plants, Asparagus, Rhubarb, Artichoke and Sea Kale Roots, Macluras, Hawthorns, Honey Locust, and Privet for hedges, also Box Wood for edgings.

The Proprietor has not thought it best to publish a Price Catalogue, as the prices of plants vary according to their rarity and size ; he is, however, determined to sell at the lowest possible rates for which they can be afforded.

Orders punctually and carefully attended to, and plants packed so that they may be sent with safety to any part of the Union.

Dr. H. L. Britton

Dear Sir

After I sent you the
book and catalogue, I found
that I had another catalogue
of my grandfather's, of much
earlier date and as it might
also be of interest to you
I send it also. The New
York Botanic Garden was
at the southeast-corner of
23rd street and Broadway
when the hotel Boutholde

now stands.

Thos. Hogg Sr. was my grand-
father, who accompanied Dr.
Torrey on many of his botanical
trips, especially in New Jersey,
which was then a rich field
for botanical research. The

Thos. Hogg whom you know
was my very dear uncle, who
was so interested in the
Torrey Club.

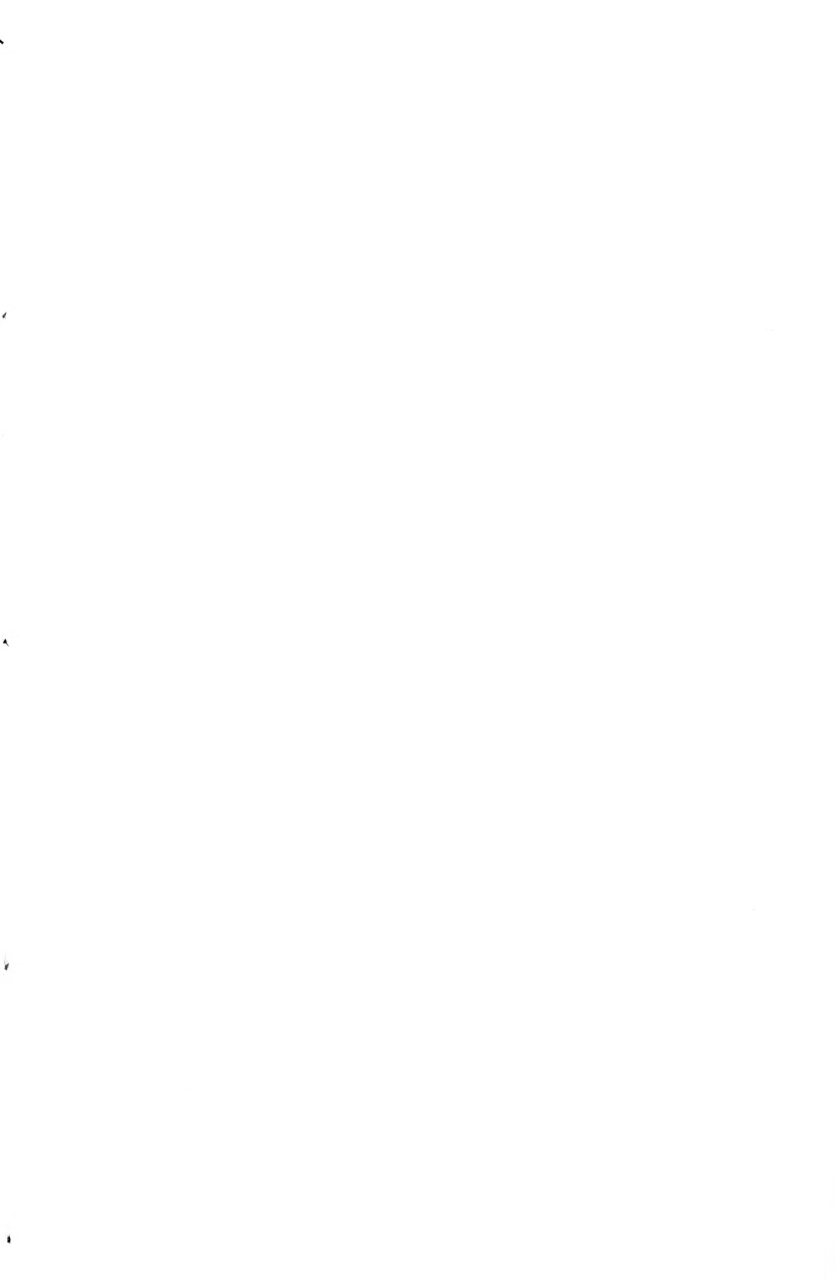

I received your very
kind acknowledgments.

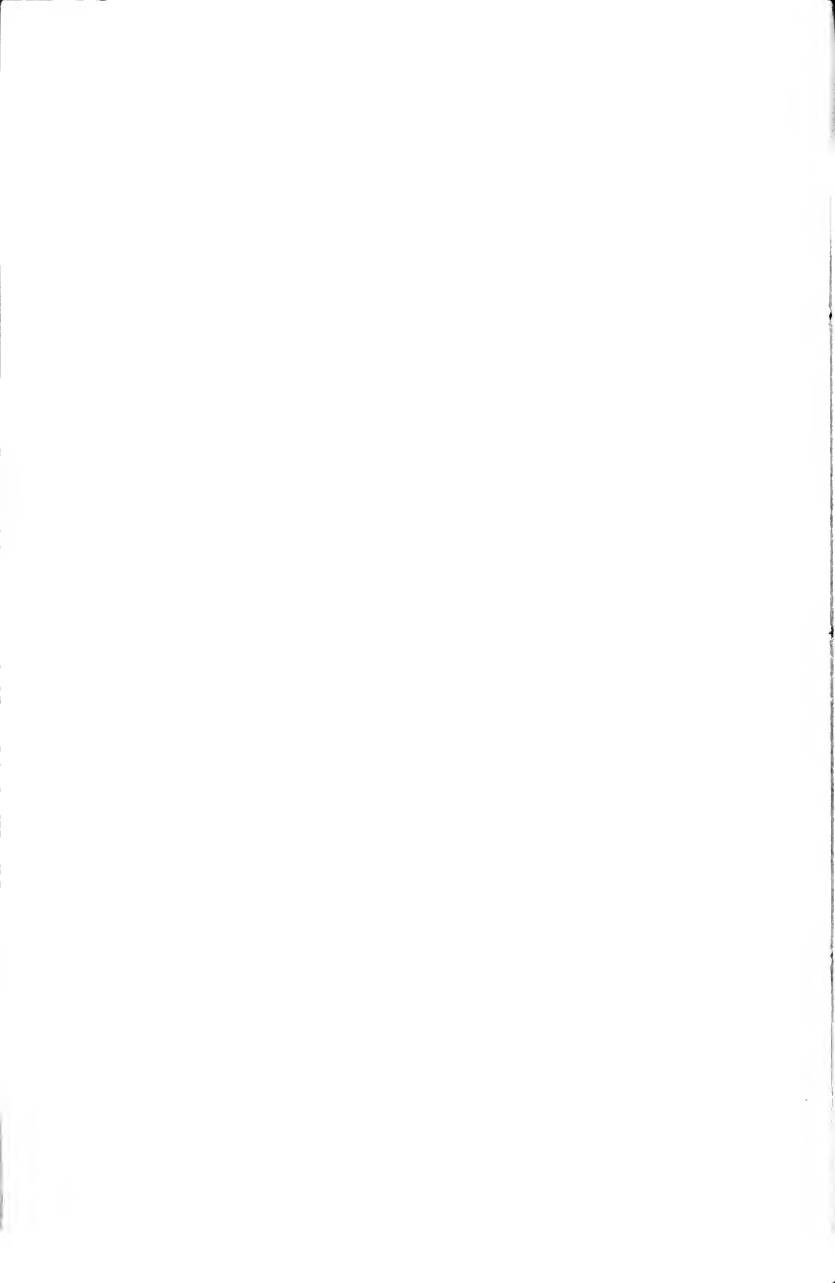

Very truly yours

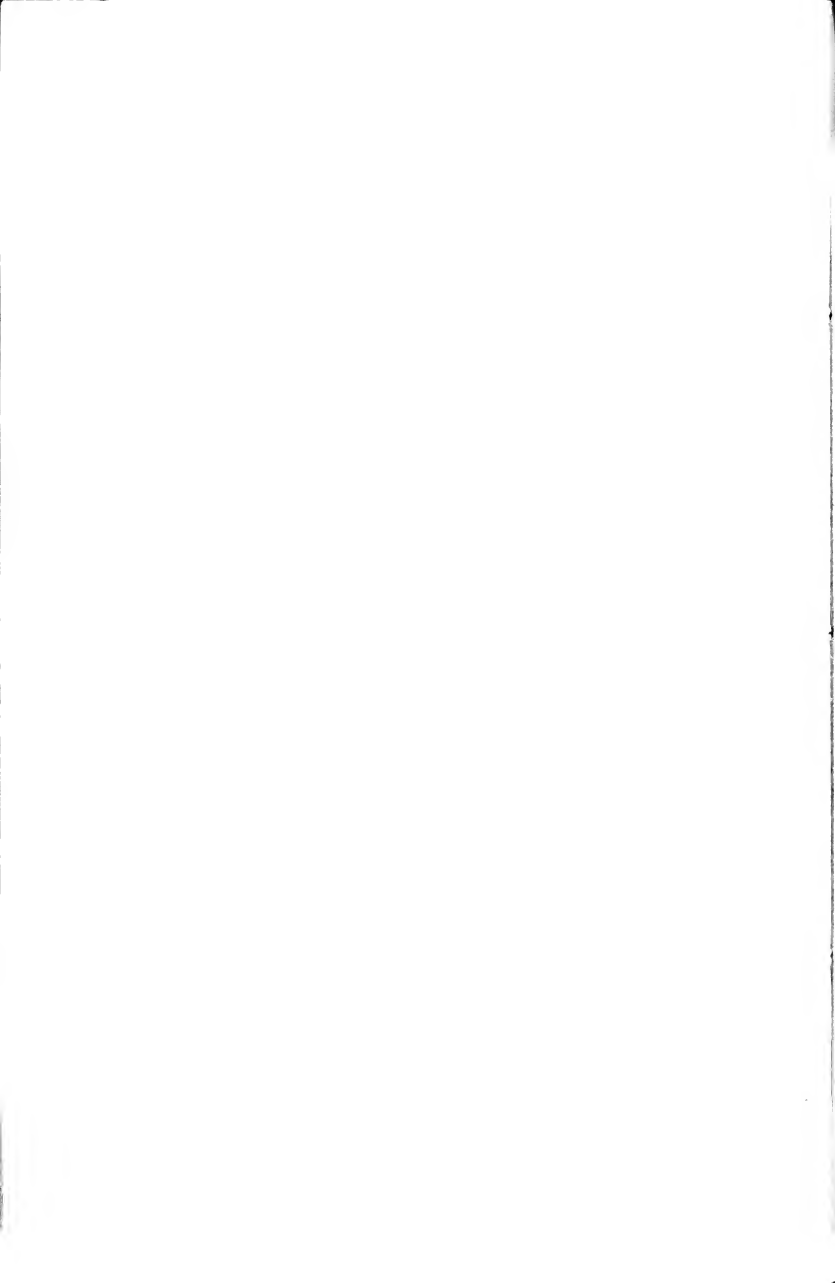

Mary C. S. Parks
